EDUCATION

Kingston Engineering college

Information Technology -Bachelor of Technology.

CGPA: 7.9

Vellore, Tamil nadu

November 2021 - May 2025

EXPERIENCE

Zoho corporation | Full Stack Web Developer Intern

Vellore,India | Jan 2026 - present

- Full Stack Web Developer Intern at Zoho with hands-on experience using HTML, CSS, JS, Java, and MySQL.
- build scalable applications like Book Bazzar, Flowerdesk, and Termido using MVP and MVC architectures.

SKILLS

Programming Languages: Java
Libraries/Frameworks: JDBC
Tools / Platforms: Git, Github, VS code, IntelliJ
Databases: MySQL

PROJECTS / OPEN-SOURCE

FlowerDesk | [Link](#)

Java

- Architected a console-based IT helpdesk system in Core Java, strictly adhering to MVC architecture to separate presentation, business logic, and data access.
- Engineered an in-memory repository using Java Collections to simulate real-time CRUD operations, ensuring rapid execution without external database dependencies.
- Implemented secure role-based authentication and a structured ticket lifecycle management workflow for efficient technical support tracking.
- Designed scalable DAO interfaces decoupling business logic to allow seamless future integration with SQL databases.

BookBazzar | [Link](#)

Java

- Terminal Application: Termido is a lightweight Java program created to manage daily task lists directly from the console.
- MVP Architecture: It strictly follows the Model View Presenter design pattern, ensuring clean code and effective separation of software concerns.
- Streamlined Experience: This productivity tool provides developers with an organized management system without the heavy overhead of a complex graphical user interface.
- Focus on Fundamentals: It serves as a practical, hands-on example of building structured
- object-oriented console applications natively in Java.
